PROFESSIONAL SUMMARY

Results-driven Program Manager with 7+ years of experience delivering complex global programs across technology companies, including LinkedIn and Amazon. Proven track record of driving process improvements, stakeholder alignment, and operational scalability. Skilled in Agile delivery, SDLC, automation initiatives, and data-driven decision making, with expertise in managing multiple concurrent programs and cross-team dependencies.

CORE SKILLS

- * Program & Technical Program Management
- * Agile / Scrum / Kanban
- * Software Development Lifecycle (SDLC)
- * Cross-Functional Leadership
- * Project Scheduling & Release Planning
- * Dependency & Critical Path Management
- * Stakeholder Management
- * Risk Mitigation & Issue Resolution
- * Process Optimization & Automation
- * Data-Driven Decision Making
- * Tools: Jira, Asana, Smartsheet, Confluence, Google Workspace, MS Office, Adobe
- * AI & Automation: LLM-powered workflow automation, internal AI tooling, knowledge retrieval systems

PROFESSIONAL EXPERIENCE

Program Manager III, LinkedIn (July 2025 – March 2026)

- * Owned end-to-end program execution, aligning product, engineering, and operations stakeholders to deliver tooling improvements
- * Designed LLM-powered automation workflows, streamlining internal tooling operations and reducing manual support overhead by 90%
- * Built a Slack-integrated AI support system, reducing average issue resolution time from 4 hours to under 5 minutes
- * Implemented a centralized Jira intake and prioritization framework, improving operational visibility and reducing risks

- * Collaborated with globally distributed teams to coordinate program execution and drive delivery outcomes

Program Manager, Amazon (September 2018 – June 2025)

- * Delivered multiple cross-functional engineering and operations programs, maintaining a 95% on-time project completion rate

- * Partnered with Data Science and Engineering teams to build and launch data-driven Sponsored Ads solutions, improving advertiser ROI by 12% and campaign conversion rates by 9%

- * Led Agile program execution, managing project schedules, scope changes, and cross-team dependencies across distributed teams

- * Developed automated dashboards and reporting frameworks, improving leadership visibility into program health and enabling data-driven decision making

- * Implemented risk mitigation frameworks, reducing potential project risks by 87% and ensuring stable delivery of high-volume operational programs

- * Managed enterprise SaaS implementation programs, aligning product capabilities with client requirements and coordinating successful customer deployments

- * Directed a team of 12+ members, setting performance goals, managing workloads, and improving team productivity by 15%

EDUCATION

- * Bachelor of Technology — Mechanical Engineering, Maulana Abul Kalam Azad University of Technology, Kolkata, India
